FortéCalTM fast dissolving calcium supplements use proprietary Frosta[®] technology to create the best dissolving calcium supplements on the market. Each FortéCal tablet contains 340 mg of elemental calcium and 100 IU of Vitamin D₃ to optimize calcium absorption. FortéCal contains the finest ingredients including all-natural flavors and the highest quality USP grade Calcium Carbonate, which also functions as an antacid.

Most people know that calcium helps build strong bones and teeth, however, calcium plays many additional roles in the body. Calcium is also used by the body to aid in the transfer of nutrients across cell membranes, assist in muscle contraction, regulate blood pressure and perform various other functions. Calcium is essential for a wholly functional, healthy body.

FAST MELTING TABLET TECHNOLOGY

Stay ahead of the competition and diversify your product line by converting *your* formulations into fast dissolving tablets. For more information about utilizing Frosta technology visit us at www.akinainc.com.
